PROJECTS

New Valley App

📅 February 2022

- New Valley is a high level android chatting application for staying connected with your family and friends.
- New Valley is build upon various advanced concepts like Firebase.
- This app includes Firebase Authentication for login, sign up and validation of users.
- New Valley also implements the use of Firebase Database which keeps your chats private.
- A unified and seamless experience is promised to the user as this app showcases the use of RecyclerView.

Share Meme App

📅 November 2021

- An Android App which lets you enjoy latest trending memes.
- The purpose of this app is the share functionality using which the user can share memes via any messaging platform.
- Share Meme is developed using Kotlin implementing various features like Intents, Volley Library, Glide Library.

Greeting Card App

📅 October 2021

- An Android App to wish your friends a Happy Birthday!
- User can generate as many greeting cards as they want, supporting each card for a different individual.
- Uses Intent for opening new activity on the user's screen.

PlayZone

📅 May 2021

- Gaming Website implementing 2048 and Guess the Number.
- 2048 is solely based on ReactJs and Bootstrap, while Guess the Number was implemented using HTML, CSS, JavaScript and Bootstrap.
